A sunset over a body of water with a city skyline in the distance. The sky is filled with dramatic, dark clouds illuminated from below by the setting sun, creating a gradient of colors from deep purple and blue to bright orange and yellow. The water in the foreground is dark with gentle ripples, reflecting the light from the sky. In the background, a city skyline is visible, with buildings and trees silhouetted against the bright horizon.

Resilience: The ability of a region or community to anticipate, withstand, and bounce back from shocks and disruptions, including:

- Natural disasters or hazards
- Climate change impacts
- The closure of a large employer
- The decline of an important industry
- Changes in the workforce

Not Just Bouncing Back...*Bouncing Forward*

“Another way of looking at resilience is the ability not only to bounce back but also to “bounce forward” - to recover and at the same time to enhance the capacities of the community or organization to better withstand future stresses.”

- Urban Land Institute – *After Sandy*

Leading the Way on Resilience

What Do the CEDS Content Guidelines Say?

Economic resilience becomes inclusive of three primary attributes: **the ability to recover quickly from a shock, the ability to withstand a shock, and the ability to avoid the shock altogether.**

Steady-state initiatives tend to be long-term efforts that seek to bolster the community or region's ability to withstand or avoid a shock.

Responsive initiatives can include establishing capabilities for the economic development organization to be responsive to the region's recovery needs following an incident.

What Do the CEDS Content Guidelines Say?

The two-pronged approach to resilience noted above can be included in the CEDS as a **separate section**. However, resilience could also be addressed by **weaving the concept throughout the document**.

Regardless of how resilience is included in the CEDS, it is critical for regions to **identify vulnerabilities** and, where possible, **bolster the capacities** that may lead to economic resilience as part of regional planning efforts.

Development Strategy**

2016 - 2020 Update

Southeastern Montana

The 2016 – 2020 Comprehensive Economic Development Strategy (CEDS) is a revision to the original 2004 report and a planning guide for Southeastern Montana.

It also enables the Southeastern Montana Development Corporation to continue as a designated Economic Development District.
